

# Looking for cost-effective solutions for your rubber components?

Mouldings? Extrusions? Rubber Hoses?  
Silicone Hoses? Metal to Rubber bonding?

Try Valley Rubber –  
experts in rubber product design and manufacture

At Valley Rubber we specialise in providing cost-effective solutions for the design and manufacture of rubber components. What's more we pride ourselves on our proactive and innovative approach to delivering high-quality products and services.

If you need it, we can produce it. By ensuring that customer needs are fully understood and met we aim to exceed customer expectations – through the use of efficient and effective systems and technology leading to the manufacture of 'Right First Time' products.

**Our dedicated team of engineers and rubber technologists have over 25 years experience in processing both thermoset and thermoplastic rubber**

Valley Rubber offer complete design and manufacturing solutions to engineering problems and we welcome the opportunity to discuss projects with you. If required we can develop new processes and materials to optimise your products and achieve significant performance and cost gains. Our quality systems are assessed and registered against internationally recognised standards (ISO/TS 16949).

Our dedicated team of engineers and rubber technologists have over 25 years experience in processing both thermoset and thermoplastic rubber. This is amply demonstrated in Case Studies you will find on our website [www.valleyrubber.co.uk](http://www.valleyrubber.co.uk) showing the range of industries we have developed and supplied solutions to.

Valley Rubber offer a very wide variety of processes including:

- **Compression Moulding**
- **Transfer Moulding**
- **Injection Moulding**
- **Autoclave Curing**
- **Extrusion**
- **Die Cutting**
- **Bonding**

Valley Rubber promises you innovative and cost-effective solutions with your satisfaction as our first priority.
